

FCC,

I benefit from listening to XM Satellite Radio and its traffic and weather channels in ways that other stations do not provide. Satellite radio provides a variety and quality that are not available elsewhere. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I respectfully urge you to reject NAB's petition 04-160 and support XM's ability to continue to provide the stations that I want and deserve. XM radio is one the best things that has happened to me. Don't cause them to make any changes to their current offering and don't slow down their programming expansion. XM radio is simply the best music, news, weather and traffic sources available today!

Sincerely,

Trey Morgan
